All I wanna do is really make it
All I wanna do is to make it work with you
All I want to do is get right through to you

What would you say?
What would you do?
Will you please, let me into

All of my hopes
All of my dreams
Would you staunch my bloodstreams?

Goodbye my tainted little princess
Can't get away from you
Goodbye my dark and lonely evenings
Can't get enough of you

All I want to do is really do it
All I want to do is stop the time with you
All I want to do is do you one last time

What would you say?
What would you do?
Will you please, let me into

All that I use
All I abuse
Why can I never refuse?

And I knew it was wrong
To engage in your crime
But I cannot live without
You turn black into white
And make everything eel...
Come on come
Come on... right
