I was born into a hell  
A living nightmare  
My world is not real  
My world is just fraud  
I never saw the sky  
Neither moon nor stars  
A morbid world created of misery

I will never be free from fear  
I'll never be free from tears  
You took my chance to live a normal life  
All these years, my life  
Just lies

The denegation of humanity  
A declaration of horror  
No salvation for my soul  
Desperation till the end of time  
DESPERATION!

You created an endless hell  
A place where there's no hope left  
I will never be free from fear  
I'll never be free from tears  
You took my chance to live a normal life  
All these years, my life  
Just lies

I wish all darkness would fade away  
I wish the sun would shine all day  
The denegation of humanity  
A declaration of horror  
No salvation for my soul  
Desperation till the end of time

DESPERATION!  
DESPERATION!
