It seems funny, I remember your number  
After all this time  
And I know that it's late  
And I hope that I'm not out o' line

But for some crazy reason  
I bin thinkin' 'bout you all day  
And every three hours now  
I bin thinkin' of somethin' to say

I love you like a fool  
Always have, always will  
But you know  
That it's just my point of view

But I love you still  
Always have, always will  
Always have, always will love you

Well now, are you sleepin' any better  
Now that I'm gone  
And I wanna know who's holdin' you tight  
Or are you just holdin' on

You're awfully quiet, I guess you're tired  
So I hang up the phone  
But you know that this ol' heart  
Can't leave well enough alone

I love you like a fool  
Always have, always will  
But you know, yes you know  
That it's just my point of view

But I, I love you still  
Always have, always will  
Always have, always will love you
