with every context of crisis that you bend - with every
arsenal and all the weaponry you invent
with every poverty-line, that you assign - you shape the
frontline - you bury landmines

the frontline - the frontline
the frontline - the frontline

silent, hidden armies, handling our disappeared - the
narco-cide and the gods that guide it
they're always oh so fucking clear - cryptomnesia
lashes out as the cover falls behind
you shape the frontline - - you bury landmines

[chorus:]

the frontline - the frontline - it suits me fine
the frontline - the frontline - you bury landmines

bullet riddled bodies for the hedonist fuck - you got me
dying to resist
because the undermined outweigh the satisfied -
corrode, reload - economist
come on, and run anomalies - our people would be
better of as enemies
in these dire-need democracies - we're all refugees -
refugees
[chorus]

charity - luxury - positioned so comfortably
equity - battery - shake hand with hypocrisy
charity - luxury - positioned so comfortably
equity - battery - hypocrisy
the context of crisis is bent
the practice is losing intent

[chorus]
