Lets stay here together you don't have to rush home
Now you know IÂ'm not a player, I just canÂ't be alone
tonight
Outside the world is ending, but still somehow
All that IÂ'm thinkin' about is you and me right here,
right now
Hoo, we're outa time, we're outa time, we're outa time

CHORUS:

Â'Cause this is the last night ever, and nothing else
matters right now
Just you and me together, holding each other in our
arms
Trying to figure out, the things that we care about
Hmm

If you could go back, tell me what would you change
Would you rewrite a line or would you tear out a page

And lord knows we've had our problems, but now they
seem
So insignificant with you in front of me lookin' like a
vision out of a dream
Hoo, we're outa time, we're outa time, we're outa time

CHORUS

There is only you, and if it's broken we can fix it babe
Sometimes it takes the fear of loosing everything to
appreciate what you have

Lets not give up (no) lets not give in
Keep your eyes on where we're going, girl, not on
where we've been
Hoo, we're outa time, we're outa time, we're outa time

CHORUS
