being here all day all night
is like i have no where to turn
i think being me is alot for me
no reason why
i have no comments
about being me and it's uch for me
when will it change

if i could fly
an i'd be awake alot
searching around the world
for my life back again
my inside so shy
my body starts to shake when i get up
and frount of my classes

when i am in high school
i thik i won't be as shy as primary
my body shakes only cause of being afride that they
might judge u
or they might laugh
what can i do to make it all stop
where is my mind going
ohH!

i want a change to happen now
want everything to be different
including my whole slef
i want thisw time to be mine
