Living in a world with no pain-

Putting my hand on the black bored
dusting off the grin you gave to me
renewing the looks on my face
now singing in the rain and now
living in a world with no pain
I put the lid on the bottle
Now sending the letter away off
to the other side of the ocean
blue Ohhh

Putting my hand on the black bored
dusting off the grin you gave to me
renewing the looks on my face
now singing in the rain
and now living in a world with no pain

I stood in a line for hours
just to met you now have come to the end
of the way there' I'm feeling a little lost
but still I can make it I think

Sometimes I feel like sealing your lips
with sticky tape can't keep reeking
everything I see around here"

Putting my hand on the black bored
dusting off the grin you gave to me
renewing the looks on my face
now singing in the rain
and now living in a world with no pain
