when you have a phone relation ship
how long does it stand how long does it last?
when i loose my words i go silent and to my other mate
feels a little something is wrong but everything is okay

don't you hate it when someone thinks your not ok
when i am upset i normally pretend
but to my mate she always tells it's amazing

when you have a phone relation ship
how does it last ? how many time's
do you get sick of the tone ringing?

I just want me to take a chance
and don't blow it like many of times
hope that this phone relationship
doesn't get out my hands

don't you hate it when someone can tell
your hiding something ? i just want the chance
to be their all day all night ...

phone relation ship can be forever
if you never ever seen the person
i am in a phone relation ship now
i have to be strong i have to take the chance
instead of blowing it away .
