i'm scared to feel left alone
the day i start high school
i hope i have lots of conferdent
i hope that i'll be able to handle
the people i see and hate...

i'm scared that i'll get lost
i'm scared i'll be in a way so
confused and sick...
i'm scared to be afraid
i'm scared that i'll be a little show off
and lose friends the first day imake friends

so many people i'll miss though
from going backwards to the beginning
of my future i'm scared something will happening
the day i start my new change... it's all a matter to me
it's something that i may need for future

i'm so scared i'll lose my strength..
I'm scared people'll will hate me
and judge me before they know me
i'm scared to be left alone
the day i begin so many things
i'm scared off i just want people
to give me chances i know i can be
anoyning for them i know ican be silly..
and too perfect..
