two lives over  
two people that ment a world to me  
forgotten about the times when them and i  
were laughing hard outside

two lives over  
two people that ment a world to me  
forgotten about the times when them and i  
were walking along the beach smiling  
two lives i've always wished to have

what's wrong with your life now  
nothing just a bit of pain  
with everything happening this year  
two lives over two deaths this year  
how can i live AGAIN

two lives over  
two people that ment a world to me  
i wish they would survive  
i wish they were here with me  
but we all are gonna die someday  
we only are younge once  
then we turn old and we then  
die it's a circle of life

two lives over  
two lives turned up side down  
two livess over  
two lives over

two people that ment a world to me  
grandprents dads mums all are a world to me  
family friends everyone encluding the earth...
