Where was I - lyrics

where was I when you needed me the most
where was I when you were callin my name
why didn't I hear you correctly
what has been goin on with me lately

if there was another chance
then I could just make it go right
when will the time arrive
when will my life be normal again???

everybody I know can make there smile go large
I know what I know I see what I see
and thats how it goes

where was I when you needed me the most
where was I when you were calling my name
where didn't I hear you correctly
what has been goin on with me lately

when will that moment i've been waiting for
happen when will I see it all again
it's bout time I made a fact
oh baby I really need you forget
bout where was I for a moment

if there was another chance
then I could just make it go right
when will the time arrive
when will my life be normal again???

oh yeah where was I when you needed me the most???.
