When I first met you, my heart was pumping and
pumping
I couldn't help myself but stare at you
I was hoping that you would too.
I wanted to be with you
But I'm just dreaming that,

(Chorus)

What if we'll never be together then
What if we'll never be together
I would stand on my own
I wouldn't complete my dreams
Because you and me are meant to be
I can complete my dreams
I can do anything
And I wouldn't let go until we're done
But for now
Just be dreaming on

What now? Is it a break up?
If it's yes I would go far away
You know I'm sad.
But you don't care anymore.

(Repeat Chorus)

I hope this would last forever
(But what if you don't want)
I would quit being famous
(But what if you don't want)
Oh Yeah!

(Repeat Chorus)

Cause what if...
Cause What if...
Cause what if...
We'll never be together
