"Where Bridges Never Burn"

Visit "[Where Bridges Never Burn](#)" on MotoLyrics.com

You've seen enough of what the world can do
I've seen too much of it without you
So tell me now as far as we're concerned
What would it take to make a place
Where bridges never burn
We've both seen life come crumbling down
We've both lost loves that we thought were true
And now though fear keeps crowding near our minds
Inside our hearts it's time to start
To leave that all behind
Where bridges never burn

No more hard lessons to be learned
Let's take this love that we've both earned
And go where bridges never burn
Love don't carry no guarantee
But we've got everything that we need
So let's hold on as long as this world turns
And try to find some peace of mind
Where bridges never burn
