### "Find You"

Visit "[Find You](#)" on [MotoLyrics.com](https://MotoLyrics.com)

I went south I went west  
Trying to find the girl that I love best  
Up north and back east  
Trying to find a place to lay my feast  
I searched the heavens I searched the sky  
I vow to search until the day I die  
I wanna find you to find me  
I wanna climb into your family tree  
I wanna dig into your history  
I'm gonna find you to find me  
Every place I ever been  
I always told them I'd be back again  
A lot of girls everywhere  
Waitin' for me now but I don't care  
There's only one I wanna find  
I'm gonna look until it makes me blind  
Searching, searching, searching day or night  
Searching, searching darling your light
