

Jason Derulo "In Love With My Guitar"

Visit "[In Love With My Guitar](#)" on MotoLyrics.com

It's never been about fortune,
never been about the fame.
Never been about money,
people calling my name.
Never cared for big houses,
never asked for fancy cars.
Why do people treat me different?
Why do they call me a star?

They don't know;
nothing in my life shines brighter now
singing the song with people listening
I'm In love with my guitar,
I know I'm different.
Growing up all my friends went out to play,
while I was in the house writing music all day
I'm In love with my guitar.

So thanks to miss music,
I didn't lose it.
I didn't lose my mind,
cause I was with her all the time.
And thanks to miss music,
I made it through it.
They said I wouldn't go far,
still I'm in love with my guitar.
with my guitar,
with my guitar.

ah huh huh ah

They can take away the jewelry,
strip me of the fancy clothes.
Put me in a dirty subway,
with nowhere to go.
Long as somebody hears me,
long as somebody cares.
I will always sing my song,
if somebody's there.

They don't know;
nothing in my life shines brighter than

singing the song with people listening
I'm In love with my guitar,
I know I'm different.
Growing up all my friends went out to play,
while I was in the house writing music all day.
I'm In love with my guitar.

Thanks to miss music,
I didn't lose it.
I didn't lose my mind,
cause I was with her all the time.
And thanks to miss music,
I made it trough it.
They said I wouldn't go far
still I'm in love with my guitar
with my guitar,
with my guitar. ah huh arr

yeah
ah he hey

Help me face the man in the mirror.
Help me see my life much clearer.
Make me who I am today,
so I have to say.

yeah

Thanks to miss music

oh oh oh yeah
oohhhhh

Thanks to miss music,
Thanks to miss music.
oehhhhh
I didn't lose it,
I didn't lose my mind,
cause I was with her all the time.
And thanks to miss music,
thanks to miss music
I made it trough it. (ah hey)
They said I wouldn't go far
still I'm in love with my guitar
with my guitar,
my guitar.

y3ah hey hieeee ohh my
