A beautiful silence falling all around
You got that pretty little smile and my favorite t-shirt on
How can this life get any sweeter slow dancing by the
fire
Hey baby that's our song
Hold me close and close your eyes

Chorus

What I want to hear you don't need to say
What you mean to me is all that matters anyway
What's in your heart I've already heard
Cause Your Love is louder than words

I remember a time not that long ago
I was waiting on love I was sleeping all alone
Now I'm wide awake your lying next to me
Yeah there's nothing between us it feels like home
Hold me close and drift away
