"De Rebus Que Greunter"

What urge me to do right?
The emptiness - the consciousness of living in
The void of the feral muting against the vacant - cold
Void - the incensed endeavour to
Rescing the fact of vacuity to be doomed
Nevertheless - my imagination - just symbols or
Repressed desires? - vision of adoration and
Death? - and the disillusion of living in
A world that has to be rescued - an age
That is sainted to mental decline and
My incapability to struggle for liberation
My last minute should not be marked
By the realization that I never really lived
