T-R-Y

Oh baby we can fight like dogs we can fight like cats
A dirty laundry needs a laundry man
Maybe the king and the queen should lay off the
caffeine
Baby breathe before you react

Sometimes we do forget to behave
And we regret what we say
Cause words are too weapons
If we don't choose'em carefully
Ladies and gentlemen this is instrumental
If life's to be a bed of roses

I know I gave you everything you like
Because you still give me butterflies

If we just try try try
Just to be ni-ni-nice
Then the world would be a better place for you and I
If we just live our lives
Putting our differences aside
Oh that would be so beautiful to me

Are we just dangling in the middle of a galaxy
Well I'm stoked on gravity
To be stuck with you like flowers on the dew drops
Now let it in my direction
My direction is up when everybody's down
Cause I don't mind being anybody's clown
I love a little lift cause I'm an optimistic
In an altruistic way

Cause basically this place is needing instruments of
harmony

Spreading my philosophy of love and inspiration
Oh these words I speak I commit to like a crime
With a rhythm I deliver I'm giving them a picture
Of the reasons why

We should just try try try
Just to be ni-ni-nice
So the world could be a better place for you and I
If we just live our lives
Putting our differences aside
Oh that would be so beautiful to me

Well it wouldn't cost a penny but could save so many
lonely lives
From teary eyes
If we just try try try
To open up a can of understanding open up your heart
I'm just planting seeds
Cause I believe

We could just try try try
Just to be ni-ni-nice
So the world would be a better place for you and I
If we just live our lives
Putting our differences aside
Oh that would be so beautiful to me

If we could try, just to be nice
That could be so beautiful to me
I believe,
Oh that could be so beautiful to me
