Hello, tell me you know
Yeah, you figured me out
Something gave it away
It would be such a beautiful moment
To see the look on your face
To know that I know that you know now

And baby that's a case of my wishful thinking
You know nothing

Well you and I
Why, we go carrying on for hours on end
We get along much better
Than you and your boyfriend

Well all I really wanna do is to love you
A kind much closer than friends use
But I still can't say it after all we've been through
And all I really want from you is to feel me
As the feeling inside keeps building
And I will find a way to you if it kills me
If it kills me

How long, can I go on like this,
Wishing to kiss you,
Before I rightly explode?
Well this double life I lead isn't healthy for me
In fact it makes me nervous
If I get caught I could be risking it all

Cause baby there's a lot that I miss
In case I'm wrong

All I really wanna do is to love you
A kind much closer than friends use
I still can't say it after all we've been through
And all I really want from you is to feel me
As the feeling inside keeps building
And I will find a way to you if it kills me
If it kills me
If it kills me

If I should be so bold
I'd ask you to hold my heart in your hand
I'd tell you from the start how I've longed to be your
man
But I never said I would
I guess I'm gonna miss my chance again

Well all I really wanna do is to love you
A kind much closer than friends use
I still can't say it after all we've been through
And all I really want from you is to feel me
As the feeling inside keeps building
And I will find a way to you if it kills me
If it kills me
If it kills me
Oh, I think it might kill me

And all I really wanna do is to feel you
As the feeling inside keeps building
I'll find a way to you if it kills me
If it kills me
It might kill me
