I will never leave
I will never leave you children
I will never leave you alone

I will never leave
I will never leave you children
I will never leave you alone

No mind can comprehend
A love that has no end

I will never leave
I will never leave you children
I will never leave you alone

I will never leave
I will never leave you children
I will never leave you alone

I will never leave
I will never leave you children
I will never leave you alone

No mind can comprehend
A love that has no end

I will never leave

I will never leave
I will never leave you children
