

## Acrostichon "Mentally Deficient"

I set my foot in my cottage  
Eyes attracted by human debris  
Floorboards covered in spinal fluids  
Oozing liquid putresence  
Open the fridge; gory sight  
Human remains; total disgust  
Mummified body concealed  
Rotting corpse beneath

Digging up corpses from remote graves  
Deathmasks fill every space on the wall  
Walking through the house dressed in human skin  
Wearing them for hours for peculiar thrills  
Am I the source of these human remains  
My mind is blank, eternal haze  
I cannot remember the things I've done  
Lost remembrance, consiousness gone
