Call on me, if you see the young girl with Cleopatra hair
Call on me, if you happen to see her in town
Give me time, I will try to escape 'cause I told her to
meet me there
Give me time, just a moment and i'll be around
Mirror Man, has got no time to talk
Mirror Man, knows how to use his walk
Mirror Man, you gotta understand
You're in danger
Mirror Man, has got no time to talk
Mirror Man, knows how to use his walk
Mirror Man, you gotta understand
You're in danger
All I need, is a break, I got plenty of things to be done
All I need, is a companion who's playin' the game
Can you see, my intentions are good if you're taking
me to someone
Can you see, and you gotta remember my name
Mirror Man, you better work it out
Mirror Man, knows what it's all about
Mirror Man, nothing can stop me now
You're in danger
Mirror Man, you better work it out
Mirror Man, knows what it's all about
Mirror Man, nothing can stop me now
You're in danger
Follow me, and I promise you every step that I make
Follow me, for a while i've been zoomin' you in
Come on up, but it must have been something you said
every chance I take
Come on up, 'cause you're puttin' my heart in a spin
Mirror Man, be careful what you do
Mirror Man, before the lie comes true
Mirror Man, you better stick around
You're in danger
Mirror Man, be careful what you do
Mirror Man, before the lie comes true
Mirror Man, you better stick around
You're in danger
