What if the rope will break
And if the knife's too blunt
And what if the roof's not high enough
And where do i get a gun

What if the pool's too shallow
And if the pill's too fused
And what if the trains already passed
And off the gas I pucked

I might as well continue
I might as well continue
I might as well continue
I might as well continue

What if the rope will break
And if the knife's too blunt
And what if the roof's not high enough
And where do I get a gun

What if the pool's too shallow
And if the pill's too fused
And what if the trains already passed
And off the ???

I might as well continue
I might as well continue
I might as well continue
I might as well continue

What if the rope will break
And if the knife's too blunt
And what if the roof's not high enough
And where do I get a gun

What if the pool's too shallow
And if the pill's too fused
And what if the train's already passed
And off the ???

I might as well continue

I might as well continue
I might as well continue
I might as well continue
What if the rope will break
And if the knife's too blunt
And what if the roof's not high enough
And where do i get a gun

What if the pool's too shallow
And if the pill's too fused
And what if the train's already passed
And off the ???

I might as well continue
I might as well continue
I might as well continue
I might as well continue
What if the rope will break
And if the knife's too blunt
And what if the roof's not high enough
And where do i get a gun

What if the pool's too shallow
And if the pill's too fused
And what if the train's already passed
And off the ???

I might as well continue
I might as well continue
I might as well continue
I might as well continue
I might as well continue
I might as well continue
I might as well continue
I might as well continue

So my kind, I've been so close
I wonder what's the use

I might as well continue
I might as well continue
I might as well continue
I might as well continue
I might as well continue
I might as well continue
I might as well continue
I might as well continue
