Jaya - From This Moment On

Wondering what it's gonna take  
To find me a place called happiness  
Somewhere that hearts don't ever break  
Destiny carry me  
To the river of my sweetest dreams  
You were a heart beat away  
And I knew I would find you someday  
Chorus  
From this moment on  
Until my life is done  
There was me and you  
And that's all we need  
We'll go wherever life may lead  
From this moment on  
You're my only one  
All the lonely days and nights are done  
'Cause we're together  
From this moment on  
I was so blind to learn my lessons  
Never this wild romantic soul  
Fate was the burning flame that burned me  
When love had left me in the cold  
Reality feels so good  
'Cause I'm touching something real and true  
And now, whatever I'll do it forever  
I'll do it with you  
(Repeat Chorus)  
It's funny how you fin'ly know that  
Someday, somewhere, someone's meant for you  
You can lead the search and waiting  
Hoping, praying behind you  
I know where love gets through  
From this moment on  
'Cause we're together  
(Repeat Chorus)
