"God And State"

Visit "[God And State](#)" on MotoLyrics.com

Another air raid paid for by government money
Another one night stand for God and country
Napalm sun in the midnight sky
Send out the jets to keep the rhetoric alive
Godless dictator bowing down to some new world
order
Retire with a pension across some neutral border
Another lesson taught by the fist of democracy
House arrest for misguided aristocracy

Fuck off with your God and state
You're gonna do what you want anyway
And it's gonna go just how it goes
But when I get pissed enough you'll know

Another helicopter in the national forest
Flown by some national guardsmen but he ain't looking
out for us
He's looking out for your weed plants
Just cause you live in the land of free it don't make you
no free man.
Corporate interest dictates the political climate
Cell block echoes with the cries of the innocent
Another lesson in subjective morality
You gotta justify some judge's salary

Fuck off with your God and state
You're gonna do what you want anyway
And your system will reap just what it sows.
But when I get pissed enough you'll know
