"Good Morning"

Visit "[Good Morning](#)" on MotoLyrics.com

Goodmorning I know it's early but I had to call
Just to tell you to ignore
That message that I left on your machine last night
What I meant to say
Was that I don't want to fight with anyone else but you
Stay out all night with anyone else but you
Don't wanna wake up sunday morning lying in bed
With a pounding in my head next to someone else
Hanging in the sun out on the front deck
Trying to figure out where all the money went
Don't wanna have to take the cat to the vet
Pawn my guitar so we can pay the rent
Don't want to have to take an STD test
For another woman it just don't make sense
And I don't wanna be with anyone else but you girl

Don't want to catch a fire with anyone else but you
Don't want to share my last line with anyone else but
you girl
I don't wanna dance to drum n bass
And have some other bitch come and take your place
Don't wanna eat fries from a paper bag
Heading home thru the city in the pouring rain
I don't want anyone on the back of my bike but you
Don't want to drink mimosas and stay up all night
With anyone else but you
I don't wanna have to sympathize
With someone else's fucked up life
And if I OD I wouldn't want anyone
But you girl to be dialing 911
Cause I don't want to be with anyone else but you girl
Goodmorning I know it's early but I had to call
Just to tell you to ignore
That message that I left on your machine last night
What I meant to say is that I love you.
