Shivering eyes
My obsessed animal
Dirty window
Hard to see through
When you're so filled

People erase all the names
In the books
Throw all your tv's and questions away
In the sea

Not even a fish is interested
In dangerous panic
That grows in boring minds
And tired heads

Don't surround yourself
With tired heads

Order imagination
Universe timestop

Celebrate your life
And you're the center
Of everything
And everyone
