So sick and tired

So sick and tired of what comes outta your mouth
just stop, and baby I'll be satisfied
you're all that makes my life miserable,
just wish you'd see, and not take me the wrong way

Chrous

so sick and tired of lies, of what you think I am,
Just take me as I am,
and then we'd have no problem,
Just need a break,
I feel so unloved with the way you treat me,

you don't like the fact I have it all together,
And I know what to do with myself
i'm so sick and tired,
Sometimes i feel like running away just from you,

chrous

so sick and tired of lies, of what you think I am,
Just take me as I am,
and then we'd have no problem,
Just need a break,
I feel so unloved with the way you treat me,

ohh yeah

i'm so sick and tired,
Leave me alone,
please I can't help being the way I am,

so sick and tired, all I wish was, To
fast forward in my life, and see what
my future is holding in for me
