"If You Want It"

Visit "[If You Want It](#)" on MotoLyrics.com

Going through these old scrapbooks
Its where the pasts been laid to rest
Innocence clashes with ambition puts it to the test
Now it's over
And this is where we've arrived
Most others would just be
Happy that they'd survived
Coz they all want it they want it
But they just don't get it now
Cutting through all the late night stoned up talking of
being blessed
Sure life's got complicated but someday babies must
be dressed
Now we've been there
And this is where we've arrived
Most others would just be
Happy that they'd survived
Cos they all want it they want it
But they just don't get it now
Get a grip on your true friends
Collect your consciousness
Then maybe
If you want it you want it
You just might get it
