"Sew Your Life"

Visit "[Sew Your Life](#)" on MotoLyrics.com

In light of recent trends come gather round your
friends
So much to talk about but words just won't come out
Oh no
The future is heel bent it won't stop when you say
"when"
This atmosphere is staid just why are we so afraid?
Cos we're always impatient with the mess we created
And we're always frustrated or something
But you can sew your life back together
You can sew your life back
In light of recent trends come gather round your
friends
Cos something's going wrong it hits just like a bomb
Cos we're always elated with the prize overstated
It's like we're always inflated or something
But you can sew your life back together
You can sew your life back
