(Jimmy Yeary/Kenny Beard/Jeff Bates)

When I need some kissin'
Some womanly attention
I know exactly right were it's at
She's got a way of losin' all her inhibitions
A man could get used to lovin' like that

She turns the lights down and when we lay down
She holds me close and she don't hold back
There's nothin' any better than a woman on a mission
A man could get used to lovin' like that

She puts her arms around me
And I know love has found me
Every day is better than the last
I never doubt how much that woman feels about me
A man could get used to lovin' like that

She turns the lights down and when we lay down
She holds me close and she don't hold back
There's nothin' any better than a woman on a mission
A man could get used to lovin' like that

She likes to keep me waitin' all day long
And teases right up 'til she turns me on

She turns the lights down and when we lay down
She holds me close and she don't hold back
There's nothin' any better than a woman on a mission
A man could get used to lovin' like that

A man could get used to lovin' like that
