Clear As A Bell

for miles down the road I seen it coming  
I always fear what I don't understand  
I blow it all out of proportion  
trying to hold on to what's out of my hands  
lifted a weight off of my shoulders  
when we cut the ties that bound our love  
now I'm only human I still long to hold her  
but now that's a feeling I can rise above

It's clear as a bell  
I hear it ringing  
sweet as the sound of a brand new day  
simple and free like children singing  
I know everything is going to be okay

out of the dark and into the morning  
the world goes around with a natural change  
I guess we got tired of riding the storm out  
now I follow my heart and just get out of the way  
even the hardest times turn into memories  
just like the blackest night turns into the dawn  
it looks like a rainbow coming through my window  
yes the light of the sun that's a powerful song
