Higher Ground

There's a star shining over Jordan  
Looks like we're going to fall to fortune  
In ribbons rings and bows  
Riding on a light so clean and fine  
It's going to change some things around here I know

Ever since last October  
I been thinking the whole thing over  
And I'm feeling fairly sure  
That we've got someone on the inside now babe  
I think they're going to show us how they  
Transcend all that's pure

Oh look here what we found  
Higher ground  
Full moon and the rivers flowing  
Pretty soon the roosters crowing  
Better open up the door  
Catch me in a dream I don't care  
I want to hold the world to my share  
And ask for a little more  
I believe we can see forever  
And all we leave behind together  
May be washed away with time  
I really want it to mean, to matter  
Silver gold wood and leather  
And heaven on my mind

Oh look here what we found  
Oh look here what we found  
Higher ground
