### "Danger Ahead"

Visit "[Danger Ahead](#)" on MotoLyrics.com

Here she comes down the street and that look is in her  
eye  
And the way she looks, if looks could kill they might  
All the kids down in the street run away  
When she goes by it's the end of the day  
So believe what they say, there's danger in the air

Look through a window and you'll see her standing  
there  
She's the latest of the greatest with the wind blowin' in  
her hair  
The prima donna she's back in town  
And you see her for miles around  
So believe what they say there's danger in the air

Chorus: Beware there's danger ahead  
The endless summer is dead  
Look out there's danger ahead

Monday mornin' she's already up and gone  
She knows what she wants and she knew it all along  
With her entourage on either side  
Just one look she can't be denied  
So believe what they say there's danger in the air

Chorus

She's got a reputation that's way ahead of her time  
She's got adulation that's way ahead of her mind  
Everybody runs around to please  
When she looks in the mirror she just has to freeze  
So believe what they say there's danger in the air

Chorus
