I love Planes Jet Aircraft
I love Planes Jet Aircraft
He was just a little boy and he sat there in his school
And the little girl in the very next chair she thought he
was so cool
And she watched him draw and draw Planes and wings
and flying things
Even during tests he'd keep on drawing
And his mother didn't want him and his father was
always working so he
Just set his head to the center of the sky and dreamed
of
FLYING at first like a leaf floating in the air
Now like an eagle soaring there
FLYING Great roaring engines now will lift my wings
Rockets now and spacecraft to the center of the sky
I'm getting ready for a great leap forward Ready for a
leap in the pool
Ready to touch the stars again Ready to go back to
school
Puttin' the pieces together Put on your wings and come
with me and
Fly fly fly to the center of the sky let's go Flying
I love Planes Experimental Aircraft
I love Planes Jet Jet Jet Aircraft
Breaking through The sound barrier
Into Into the Light
And the little boy is still like a little boy and he met
another
little girl and they made another little boy
And the new little guy still loves planes and flying
things
And both his mother and father love him and
Hold him and hug him whenever he needs it and
Soon will send him lovingly to the center of the sky
and teach him
Flying and Dreaming and Visions True Flying
I love Planes Jet Aircraft
I love Planes Sensual Aircraft
