### "Friend To Me"

I've peeped through a window  
Looked here & there & then some more  
Who else can it be  
When you're sure you've tried it all  
Did you ever know that you'd find a friend  
Did you ever dream that he'd with you  
thick & thin  
Catch me if i fall  
We've nothing to fear at all  
Cause we have made it grow  
And we've learned what there is to know

If you let it be--So unselfishly  
Be a freind to me  
You'll be a friend to me  
When you heart's full of love  
There's a well you're giving of  
It's yours for free  
it has no end.
