I don't mind being lonely
But i do mind if not being loved
Maybe you're feeling the same way too
You're ready to hold some one

(chorus)

I really wanna know you
I really wanna show you the way i feel
I really wanna know you
I really wanna show you the way i feel

Something about you is telling me
We're coming from the very same place
It's only just a notion i have
(but) i see it written over your face

(repeat chorus)

(***) you've got something about you that i want
around me
Something i've been searching all my life through
So now it's up to you, yeah, yeah
Tell me what you're gonna do
I wanna know yeah yeah yeah

Everytime i see you it's the same thing all over again
You're doing something to me it's true
And i don't want to fell it end

(repeat chorus and repeat ***)
