It took three times but she finally tied the knot
She wasn't gettin' any younger but I never would have
thought
That the stupid one would be my best friend
I guess we'll never see him baby ever again
He said she's just a little crazy it's all that I could find
He said she's just a little crazy
I think I could live with that
I hope someday what you've got is mine
But you didn't have to hurry, there's still so much time

Like everything else I hope you don't run away
You've got so much more now, that's why you've got to
stay
He said she's just a little crazy it's all that I could find
He said she's just a little crazy
I think I could live with that
I think I could live with that
Please don't tell me that I can't
Baby there's no turnin' back
I think I could live with that
