Ayo wrote this song so many times  
Cos I had so many lines  
And what their doing is bad  
They don't want you to shine  
You aint you alone keep on trying  
There insomniacs, they hate on people with dreams,  
that's alright  
I got so many dreams it's nothing  
I could sleep for a hundred nights  
Teachers boyed it with the passes  
Just capital fs in the margin  
But they never pushed my heart in  
Still knew I would win though(window) like the square  
with glass in  
They wanna bring you down  
All them hateful people stuck on the ground  
They try they can't touch the sky  
That's why they wish death on the clouds

(Chorus)

(Hold on) they love it when you do bad (hold on)  
They hate it when you do good (hold on)  
But if you want something then you should (hold on)  
They love it when you flop (hold on)  
Hey don't want to see you on top (hold on)  
But if you want something don't stop (hold on)  
I want it I do it I get it I got it x3  
Dun know dun know dun know I'm on it  
I want it I do it I get it I got it x3  
Dun know dun know dun know I'm on it

Some of them come like magnets, this is true  
Do something positive, and the negative sticks to you  
But from when I was born in a march, conceived in a  
june  
I crossed my heart and said I will fight till I R.I.P in a  
tomb  
My ambitions are over the moon  
More than being a goonie goon  
So it is what it is do what you do  
But everyday is a boomerang what you throw outs

gonna come back to you  
Love or hate g that's the rules  
But you know, sticks and stones can break bones  
What are there words gonna do?  
Nothing  
The only words could scar me  
Come with black ink on a tattoo

(Chorus)

I couldnt look in the mirror  
And stare at my face  
If I let them give me the red light  
Never gonna get stopped by a snake (nah)  
I wasn't raised up that way (huh)  
I saw the beef explode  
When I should have been watching nickelodeon shows  
But it never broke me down even though I came out of  
a broken home  
And there's a million similar scenarios  
What don't kill you makes you strong  
What don't sink you helps you float  
That's more power to help you so  
They wanna hate just know  
You can't plant poison and get a rose  
Karmas real what you plant will grow  
That's fast food for your brain take it and go
