"Silent Wonder"

Visit "[Silent Wonder](#)" on MotoLyrics.com

The sun sets over the ocean
stars race 'cross the opposite sky
All visions silent wonder
no need for prying eyes
A breath is shown in movement
The waves lap distant shores
A world breathes in wonder
So silent as she does
She does
Silent wonder
She does
Silence

A fire burns under water
From pressure diamonds shine
There's silence in formation
Unnatural in these times
A thousand miles are passing
Above, below inside
With out her recognition
The world still turns in wonder
So silent as she does
She does
Silent wonder
She does
Silence

Explosions deep in side me
Brings forth another life
With all that ancient wonder
That moment is so silent...
Divide yet multiply me
The essence of my form
To live only to die here
Return to where im from
In silence
I wonder
