Si ya acabo (If It Finishes)

Say me because you cry  
Of happiness  
And porqu   you suffocate  
For the loneliness  
I gave because you take me, fort like that, my hands  
And your thoughts are taking you

I love you so much  
And because it(he,she) will be  
Stubborn madman, you do not doubt it mas  
Though in the future, beech an enormous wall  
I do not have fear  
I want to fall in love

You do not love me, because you think that I seem to  
be different  
You do not think that is the just thing to see to  
happen(pass) the time together  
You do not love me, that I understand(include) the lie  
that would be  
If your love I do not deserve, you do not love me, mas  
remain another day

You do not love me, because I am lost, because  
it(he,she) changes the world,  
Because it is the destiny, because it(he,she) cannot, we  
are a mirror  
And your this way you would be what I of my reflex  
You do not love me, to be dying, inside a full war of  
Repentances, you do not love me, to be in land, I want  
to take off  
With your great love for the blue of the sky

I do not know that saying to, this is the true  
If the people want, it(he,she) can hurt  
Your and I we will divide, they do not move  
But in this sky alone you do not leave me

You do not leave me, do not leave me, do not listen to

me, if I say  
to you " you should not love me "  
You do not leave me, do not disarm, my heart with this  
" you do not love me "  
You do not love me, you I request it, my bitterness  
leave me  
You know well, that I cannot, that it is useless, that  
always you amarÃ©e

You do not love me, since I will make you suffer with  
this heart  
that I fill with thousand winters  
You do not love me, for this way to forget of your gray  
days I want  
that you love me only for loving myself  
You do not love me, your and I we will irritate one with  
other  
one and will be still always united  
This love is like the Sun that goes out besides the storm  
As two comets in the same stela

You do not love me  
You do not love me
