Tonight

All I am is here and now

I opened up my heart to you, and found where I belong

Everybody has a dream

Being here with you can't be, as real as it seems

I've dreamt of this maybe, a thousand times or more

But in your arms I've never felt this way before

[Chorus]

Tonight, I give you all of me

There's nothing left to see

My heart is on my sleeve

Tonight, If I could take tonight

And make it last forever

I'd spend here together, with you

Lets make this moment last in time

Without you if I had the stars

The stars they wouldn't shine

I wanna take tonight to show you how i feel

To make you see that my love for you is real

That these words they speak the truth

Without you there's no point

In reaching for a dream

There'd be no here and now

Just what we might have been

[Chorus]

[Bridge]

If tonight is all we have

If all of this was never meant to be more than a dream

I'd do it all again, i wouldn't miss a thing

Cos everything I believe, was leading to this moment

With you.....

[Chorus]
