Hey, oh  
It's been a long long time  
I was finally lettin' go  
I can't believe how it hurts just to see you smile

So I've been on your mind  
Had to come back to say hello  
You had to be with someone you care for a while.

So things have changed  
But you don't know just how maybe I've changed  
But I tell you right now  
One thing remains  
If you come closer you'll see it's the.

Same heart  
You used to give your love to  
Same heart  
You broke and left behind  
The same heart  
You once closed the door to  
Wants you back  
It's still beating for you  
Hey hey  
You...

I remember it well, babe  
We were talking forever back then  
I believed it until you made up our minds  
I remember.

Any fool could tell  
We could never be just friends  
Have you come back to claim what you've once left  
behind  
Oh...

'Cause nothing's changed  
I'm wiser, it's true, but nothing's changed  
(Nothing's changed)  
I'm still loving you  
What remains is just be sure what u need is a

Same heart  
You used to give your love to  
Same heart  
You broke and left behind  
The same heart you once closed the door to  
Wants you back  
It's still beating for you.

Wooh

Don't start to cry  
Just show me why  
I should trust you with the same heart.

I wanna know

It's the same heart  
You used to give your love to  
The same heart  
You broke and left behind  
The same heart you once closed the door to  
Wants you back  
It's still beating for you  
(And wants you back baby).

Wooh, it's the same heart  
(You used to give your love to)  
Wooh, it's the same heart  
(You broke and left behind)  
(It's the)  
The same heart  
You once closed the door to  
Wants you back  
It's still beating for you.

Same heart  
(Same heart ooh yeah)  
Baby, I give up the same heart  
(Same heart oh yeah)  
Same heart  
You once closed the door to  
Wants you back is still beating for you
