I can't feel my life  
Makes me wanna cry  
How bad I feel inside  
Like I wanna die

Can't explain, won't apologize  
Re-entry blown while I was gone  
Tilt of axis changed

Destination unknown  
Wreckage in tow  
Depression grows  
I have no home

Consequences on accepted role  
Discontented seeds, loveless garden thrown  
Bitter crop to reap

Understanding hard-pressed won  
Through me you feel the void  
From where the sad sounds come

Free return alone  
In time to see the sun go black
