I love to hear that rhapsody in red
It just knocks me right out of my head
Lifts me up here, just floating's around
Sends me way up and it don't let me down

I love to hear that rhapsody in red
On my feet or laid back in my bed
Takes me way back where I don't mind
Takes me way back in my time, my time

Sail away on that rhapsody in red
Don't care where those other rainbows led
With all those northern lights just blowing away
Got no thought to relate in the same old way anyway

Love to feel it flood down to my soul
Loving feel just like in days of old
I sing blues, where has it led?
Gimme some more rhapsody in red, in red
