Visit "[Of The Black](#)" on MotoLyrics.com

a wolf in a man
sick thing that i am
an engine to fuel the kill
a new begining
your world is ending
so sit back and watch it die
the true lords of man
beasts on hind legs stand
ready to take our place of dominion
a new begining
your world is ending
so sit back and watch it die
and we have eaten the flesh
of the older gods that we remind you of
and we have taken all that they had left to give
and we have eaten the flesh of the older gods
we remind you of
and we have taken every reason you had to live
see the nations fall ruled by tooth and claw
this is the old religion
a new begining your world is ending
so sit back and watch it die
and we have eaten the flesh
of the older gods that we remind you of
and we have taken all that they had left to give
and we have eaten the flesh of the older gods
we remind you of
and we have taken every reason you had to live
the final attack
with no turning back
we are the beasts of the black
