Rats in the walls of the enemy  
Rats tearing holes insanity  
Tear down these walls and leave us be  
Rats outside of society  
Rats tearing holes in reality  
Vermin we were born and so will be  
Scum of the Earth is all you see  
Scum of the Earth eternally  
Rats coming up from the underground  
Death comes at night without a sound  
Plague on mankind is coming down  
Rats leave a trail of dead behind  
burn as the fires of hell unwind  
hate and pestilence behind our eyes  
we lie in wake while you are sleeping at night  
behind the safety of your walls  
there is no way that you can stop us tonight  
behind the safety of your walls  
There is not one of you that will be left alive  
behind the safety of your walls  
you all must know this is the end of your kind  
behind the safety of your walls  
Rats in the walls of the enemy  
Rats tearing holes insanity  
Tear down these walls and let us be  
Tear down these walls and leave us be
