"I Would"

Visit "[I Would](#)" on MotoLyrics.com

If I could wash away the clouds
With a wave of the hand
If I could make the sun come out
Shine its warmth down on the land

I would

If I could stop you feeling bad
With a kiss upon the head
Bring you back the peace you had
When you dreamed in your dream bed

I would
I would forever and make you whole

If I could ever tell you how
Deep inside I really feel
Stop and turn and face you now
With a hand upon the wheel

I would
I would and forever make you know

If I could wash away the clouds
With a wave of the hand
