Through the thick and through the thin  
On your love I can depend  
I must admit I thought about it now and then  
But we were never more than friends

And it caught me by surprise  
When I looked into your eyes  
Something made me recognize  
I needed you, you

Would it all be a mistake?  
(Girl, if we make love)  
Would you and I still be feeling this way?  
(After we make love)

And friends will we remain?  
(Girl, if we make love)  
Can we promise that nothing will change?  
(After we make love)

I still remember when we met  
You had a smile I won't forget  
And I would lie if I say I have never had  
A thought of you when I'm alone in bed

Would it catch you by surprise?  
Would you think I read your mind  
If I were to say that I had longed for you, you?

Would it all be a mistake?  
(Girl, if we make love)  
Would you and I still be feeling this way?  
(After we make love)

And friends will we remain?  
(Girl, if we make love)  
Can we promise that nothing will change?  
(After we make love)

Baby, I don't wanna lose  
Lose the friend I have in you  
But my desire is taken over me

If love is knocking at the door  
Who are we to ignore?  
How do we know that love will come again?

Would it all be a mistake?  
(Girl, if we make love)  
Would you and I still be feeling this way?  
(After we make love)

And friends will we remain?  
(Girl, if we make love)  
Girl, can we promise that nothing will change?  
(After we make love)

Would it all be a mistake if you and I made love  
tonight?  
(Girl, if we make love)  
I wanna to know, will we still be feeling this way, girl  
After we make love tonight?  
(After we make love)

And friends will we remain, what's to become of you  
and I?  
(Girl, if we make love)  
I've gotta to know, can we promise that nothing's  
gonna change?  
(After we make love)

Would it all be a mistake?  
(Girl, if we make love)  
Would you and I still be feeling this way?  
(After we make love)
