My heart knows

It needs protection

While it grows

Somebody show me

A place i can go where love's around

A trip to the ocean

I just need to get far from town

There's no way around this

No way around this

No way around this troubled soul

Now you're gone

And i stand, i stand

Between time

Somebody show me

A place i can go where love's around

A trip to the ocean

I just need to get far from town
